

# Change in OSHA Regulation Requires Training for ALL Employees & Physicians and New Compliance Plan by June 1, 2016

Federal OSHA regulations **have been amended** to align with the *United Nations Globally Harmonized System of Classification and Labeling (GHS)* to ensure the provision of consistent hazard warning information to employees and physicians working with, in or around hazardous materials (i.e. gas under pressure) and chemicals (i.e. specimen preservatives, lab materials).

**As a result, medical setting employee and physician training and written Hazard Communications Plan modification is MANDATORY by June 1, 2016. Also, as new employees or physicians are hired after June 1, they must also receive the Hazard Communications training prior to beginning work.**

Montgomery County Medical Society has partnered with OSHA Medical Courses, LLC to offer you a One-Stop Solution to comply with this new requirement by June 1!

### MCMS Offers:

- Individual Employee/Physician Training which can be done in your practice using a PC/laptop!
- Hazard Communications Plan Template which can be customized for each location of your practice.

**Call today to get more information about these services to help you comply with this new OSHA regulation by June 1! 301.921.4300**

**Or return this form by fax to 301.921.4368 and we will send you details!**
